

SUMEDH S KHOBRAGADE

Nagpur, Maharashtra, India | +91-7559275916 | khobragadesumedh27@email.com
[linkedin.com/in/sumedh-khobragade](https://www.linkedin.com/in/sumedh-khobragade) | github.com/Logic-Voyage

PROFESSIONAL SUMMARY

Electronics and Telecommunication Engineering undergraduate with hands-on experience in Android app development, IoT, embedded systems. Proficient in C++, Python, and SQL, with a proven ability to independently design and ship production-quality applications. Currently expanding expertise in Data Analytics.

EDUCATION

B.Tech – Electronics and Telecommunication Engineering, YCCE, Nagpur CGPA: 8.69 / 10.0	2023 – 2027
Higher Secondary Certificate (12th), The Lord's Public School, Nagpur 69.5%	2023
Secondary School Certificate (10th), Sunny's Spring Dale School, Nagpur 85.8%	2021

TECHNICAL SKILLS

Programming: Python, C, C++, SQL, HTML

Mobile Development: Android SDK, Jetpack Compose, Android Studio, Material Design 3

Data Analytics: Microsoft Excel, SQL, Data Cleaning, Data Visualization, MATLAB

IoT & Embedded Systems: ESP32, ESP8266, RFID, DHT11, Ultrasonic Sensors, TDS Sensors, Arduino IDE, PlatformIO

Tools & Platforms: Git, GitHub, VS Code, MATLAB, CST Studio Suite, OpenCV

PROJECTS

AuraStand – Android Standby Display Application *Kotlin | Jetpack Compose*

- Developed AuraStand, an Android standby dashboard in Kotlin and Jetpack Compose featuring multiple clock styles, AMOLED dark mode, custom backgrounds, immersive fullscreen mode, and responsive landscape UI.
- Built a modular widget system with photo slideshow, calendar, battery status, rotating quotes, auto page rotation, 24-hour clock, and persistent user settings.
- Optimized performance through reusable Compose components, smooth animations, efficient state management, and resolved complex orientation and split-screen rendering issues.

Smart Water Quality & Overflow Detection System *ESP32 | C++ | IoT*

- Developed an ESP32-based IoT system integrating TDS, ultrasonic, and temperature sensors for real-time water quality and overflow monitoring, with wireless data transmission and remote dashboards.
- Presented at VNIT Nagpur 5G Summer School as the capstone project of a structured research program on smart infrastructure and communication technologies.

Emotion Detection System *Python | OpenCV | Machine Learning*

- Built a real-time facial emotion recognition system using Python and OpenCV, applying image preprocessing, feature extraction, and model evaluation to achieve reliable detection accuracy across multiple emotion classes.

EXPERIENCE

Summer School Intern – 5G & IoT Research, VNIT Nagpur

- Completed an intensive one-month program on 5G communication technologies, radio access networks, and spectrum management.
- Developed and demonstrated an IoT-based smart water monitoring solution as the capstone project for the program.

CERTIFICATIONS & TRAINING

- NPTEL – Object Oriented Programming in C++ (Indian Institute of Technology)
- Web Development Workshop – IIT Bombay Techfest
- MATLAB Certified – Signal Processing and Simulation
- Blockchain Workshop – NIT Raipur
- 5G Summer School Certificate – VNIT Nagpur
- Data Analytics Training – Ongoing (Excel, SQL, Data Visualization)
